

Discover the many ways that Carpujet® supports your safety initiatives...

Standardized dosing helps prevent medication errors

- Easy-to-read labels provide clear identification
- Ready for bedside bar code scanning

Helps control drug diversion

- Each SLIM-PAK® tube holds a single Carpuject cartridge
- Provides tamper evidence and tamper resistance at the unit-dose level
- Compatible with automated dispensing machines

Helps prevent needlestick injuries

- Luer-lock "universal" connector
- LifeShield® CLAVE® connector compatibility

Helps minimize waste through unit-dose packaging

- Convenient SLIM-PAK packaging assures product integrity
- Unopened and unused product can be returned to inventory

...and helps ensure best practices at your institution

"Pharmacists should dispense medications in ready-to-administer dosage forms whenever possible. The unit dose system is strongly recommended as the preferred method of drug distribution."
