

AN INTRODUCTION
TO THE
MECHANICS OF FLIGHT

N.H. FLETCHER

DEPARTMENT OF PHYSICS
UNIVERSITY OF NEW ENGLAND
ARMIDALE N.S.W.

First Edition 1973

Second Edition 1973

CONTENTS

Preface	1
References	3
A. Fluid Flow	4
1. Bernoulli's theorem	4
2. The Venturi tube	7
3. The Pitot tube	8
4. Streamlines and free flow	11
5. Viscosity and turbulence	12
B. Aerofoils	17
1. Lift of an aerofoil	17
2. Drag on an aerofoil	22
3. Lift-drag ratio	26
4. Flaps, slots and slats	28
5. Propellers	30
6. Jets	33
7. The Flight of Birds	35
C. Aircraft Flight	37
1. Introduction	37
2. Level flight	38
3. Gliding descent	41
4. Gliding in wind	42
5. Climb	44
6. Turns	46

D.	An experiment on aerofoils	51
	1. The basic experiment	51
	2. Advanced work	53
E.	Navigation	54
	1. Wind triangles	55
	2. Course correction	61
F.	Gyroscopic flight instruments	63
	1. Fundamentals	63
	2. Precession	65
	3. Gyro compass	68
	4. Gyro horizon	69
	5. Turn indicator	71
G.	Problems	74
