Table 1.2. Real Gross Domestic Product
 [Billions of chained (1996) dollars]
 Seasonally adjusted at annual rates
 Warning: Do not add Chained Dollars
 Bureau of Economic Analysis

Note. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Percent changes from preceding period for selected items in this table are shown in table 8.1; contributions to the percent change in real gross domestic product are shown in table 8.2.

Chain-type quantity indexes for the series in this table are shown in table

	Gross domestic product

Employment: <http://stats.bls.gov/ces/home.htm> series EES00000001, Total Nonfarm Industrial production <http://www.federalreserve.gov/releases/g17/ipdisk/ip.sa>

Sales: Monthly data for underlying detail, http://www.bea.gov/bea/dn/underlying_n

Income: NIPA tables from <http://www.bea.doc.gov/bea/dn/nipaweb/AllTables.asp#>

From table 2.8, get income in current dollars by subtracting line 15 from

From table 2.9, get the price by dividing line 10 by line 11

Calculate real income by dividing income in current dollars by the price

002U 0 Note - Estimates in this table are based on the North American Industry Classification System (NAICS).

002U 0 Chained (1996) dollar sales series are calculated as the product of the chain-type quantity index

002U 0 and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula

002U 0 for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar

002U 0 estimates are usually not additive.

1. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.
2. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of the estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates.
