

# TRANSPORTATION JUSTICE INCREASES TRANSPORTATION ACCESS, IMPROVES PUBLIC HEALTH AND SAFETY, AND ENSURES EQUITY

I support **TRANSPORTATION JUSTICE** and would like my local elected officials and SANDAG board members to adopt a Regional Transportation Plan that:

- Builds public transit and biking/walking infrastructure projects first, postponing any freeway expansion until this network is fully operational
- Develops transportation options that reduces vehicle miles traveled, reduces air pollution, and reduces climate change causing greenhouse gases
- Reduces *the risk of being hit by a car through improved bike/walk infrastructure, improves speed and frequency of transit, and maintains* affordable prices
- Prioritizes improving transit and bike/walk infrastructure in overburdened communities
