

# BAZOOKA DRY 800 HERBICIDE

*Unique, Patented Soluble Granule Glyphosate Formulation.*

## Product Overview

- **Bazooka Dry 800 SG** is a non selective herbicide containing 800g/Kg of the active ingredient glyphosate present in the form of the acid and ammonium salt.
- It is registered for the control of a wide range of perennial and annual weeds in a range of situations including general weed control, non agricultural, brush and woody weed, aquatic and forestry uses.
- **Bazooka Dry 800 SG** has a high loading of aquatically approved adjuvant within the formulation.

## Key Features of Bazooka Dry 800 SG

- High loading of glyphosate – 800g/kg
- Patented and unique adjuvant system
- Unique soluble granule formulation
- Provides fast burn-out of weeds
- Aquatically approved surfactant
- Highly soluble in cold water, Low foam formulation
- Highly compatible due to its unique adjuvant system
- Easy to Use packaging – 15kg. No drum muster levy

## Mode of Action

Group	<b>M</b>	Herbicide
-------	----------	-----------

Glyphosate, the active ingredient in **Bazooka Dry 800SG**, controls weeds by inhibiting the activity of the EPSP enzyme (5-enolpyruvylshikimic acid-3-phosphate synthase), which is necessary for the formation of the aromatic amino acids within the plant. These amino acids are important in the synthesis of proteins that link primary and secondary metabolism of nutrients. As a result of the reduced metabolism of nutrient within the plant, food sources required for growth are not available, essentially resulting in weed death in 7-14 days. EPSPs are present in the chloroplast of most plant species, but are not present in animals, providing a high degree of safety to users. **Bazooka Dry 800SG** is classified as a Group M herbicide.

Glyphosate is highly systemic within the plant. Hence, upon entering the plant's foliage, glyphosate moves downwards throughout the plant to the root system.

## Use Rates

Situation	Rate/ ha (boom application)	Handgun (per 100L of water)	Knapsack (per 15L of water)
Domestic Areas	-	-	4.5g per Litre of water.
Annuals	0.9-1.35kg	225 – 315g	35 – 45g
Perennial Weeds	1-4kg	225 – 700g	75 – 700g
Brush & Woody Weeds	-	250 – 700g	35 – 100g
Aquatic Weed Control	1-4kg	250 – 700g	35 – 100g
Forestry	0.9 – 4kg	225 – 700g	35 – 700g

## Unwanted Tree Control Rates

Method	Tree Size	Mixture (by Vol) Product:Water
Cut Stump	0 - 10cm (diameter)	1:30
Foliar Application (Gas Gun / Splatter Gun)	0 – 1.5m (Height)	1:10 - 1:30
Foliar Application (Knapsack / Handgun)	0 – 1.0m (Height)	450 – 700g per 100L.

**Wiper Equipment** – Mix 1kg of Bazooka Dry 800SG with 5L clean water to prepare 17% solution. Travel at 8km/hr.

Please note: This information is not intended to replace the product labels. Always read the complete product label appearing on the container before opening or using products. Product labels also available at [farmalinx.com.au](http://farmalinx.com.au).

## How to get the best results from Bazooka Dry 800 SG

- Do not disturb treated weeds by cultivation for 1 day after treatment for annual weeds, and 7 days after treatment for perennial weeds.
- Do not treat weeds under poor growing or dormant conditions including drought, water logging, disease and insect damage or following frost.
- Reduced control may occur when treating weeds heavily covered in dust or silt.
- Glyphosate is inactivated on contact with the soil. Glyphosate is absorbed by the foliage, with rapid translocation throughout the plant.
- Ensure spray tank water doesn't have a high pH, suspended solid content and elevated water hardness levels as this will impact upon performance.
- When using **Bazooka Dry 800 SG** in waterways, only treat ½ half the water body at a time, to prevent fish kills caused by dissolved oxygen depletion.
