HYDRALINX

# Back2Blue

**pH ADJUSTER**

Back2Blue pH Adjuster is used to raise total alkalinity in pool water. A low total alkalinity may cause pool water to be corrosive and irritating and may result in staining and etching of the pool surface and fittings. A low total alkalinity may also cause the pH to fluctuate excessively. This is known as pH bounce.

## DIRECTIONS FOR USE

Add pH Adjuster as needed based on testing to maintain a reading of 80-150ppm. Add 15 grams of Back2Blue pH Adjuster per 1,000 liters of pool water to increase the total alkalinity by 10ppm. It is best to dissolve Back2Blue pH Adjuster in a bucket of water before adding to the pool, in front of the return to pool inlet. Allow filter to run for 4-5 hours before retesting.

## DO NOT MIX CHEMICALS

Apply this product only as specified on this label. Additional information on use and handling of this product may be obtained from Hydralinx.

## NOTICE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. No warranty (other than non-excludable statutory warranties) of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions, or under off-label permits not endorsed by HYDRALINX Pty Ltd or under abnormal conditions. HYDRALINX Pty Ltd accepts no liability for any loss or damage arising from incorrect storage, handling or use.

Batch No.
