**Bumper sticker attachment instructions:** Clean attachment area. Cut out sticker. Position sticker with small pieces of Scotch tape, one at each end. Put Scotch tape around all edges of the sticker, making sure that all of the edges are overlapped, but leaving the main, central, area of the sticker uncovered (This is so that the sticker can dry out quickly if it gets wet. Experiences has shown that covering even the entire sticker with transparent tape will not keep it dry in a heavy rain). For more stickers, other USPP promotional materials, or further information about the USPP: [blyttle@igc.org](mailto:blyttle@igc.org), or the USPP website: [www.uspacifistparty.org](http://www.uspacifistparty.org)
